a) The only ingredients of animal origin used in manufacture of Caninsulin are:
insulin manufactured by Diosynth and derived from porcine pancreatic materials of Dutch and/or
French origin. The porcine pancreatic material was processed to inactivate pathogenic viral agents
by treatment with 88% alcohol for several hours at a pH no greater than 2;

and

bovine insulin crystals manufactured by Novo Nordisk as described in the European Directorate for the Quality of Medicines Certificat
of Suitability No. CEP 2000-230. This Product is manufactured from bovine pancreas of Australian and New Zealand origin. The bovin
pancreatic material was processed to inactivate pathogenic viral agents by treatment with low pH of approximately 3.0 and with alcohol
at a concentration of a minimum of 60%.

b) The insulin is purified by chromatograph
