Appearance	An off-white to yellowish coloured suspension.	Complies
Identification Meloxicam	The chromatography of the assay exhibits a major peak due to Meloxicam, the retention time of which corresponds to that exhibited in the chromatogram of the standard in the HPLC assay. Alternative UV method <sup>§</sup> : The absorption spectrum of the sample solution exhibits a maximum at about 340 nm.	Complies  Non-routine Test
Active Assay	1.5% w/v Meloxicam ± 5% (1.425 - 1.575 %w/v)	1.484%w/v Complies
pH	4.3 ± 0.5	4.4 Complies
Identification Preservative	The chromatography of the assay exhibits a major peak due to Sodium Benzoate, the retention time of which corresponds to that exhibited in the chromatogram of the standard.	Complies
Preservative Assay	0.5% w/v Sodium Benzoate ± 10% (0.45 - 0.55 %w/v)	0.501%w/v Complies
Particle size analysis **	D(10): NMT 30 µm D(50): NMT 55 µm D(90): NMT 110 µm	Non-routine test Non-routine test Non-routine test
Viscosity <sup>§</sup>	5 - 15 P	Non-routine Test
Microbiological Quality*	Conforms to Ph. Eur., Monographs 2.6.12 and 2.6.13	Non-routine Test
Uniformity of Mass of Delivered dose	Conforms to Ph. Eur., Monograph 2.9.27	Complies

\* This is a non-routine test, conducted on one in every 6 batches manufactured.

§ This is a non-routine test, conducted on one in every 10 batches manufactured.
